About the NRMP

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank-ordered choices of applicants and program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and programs' preferences for each other consistently.

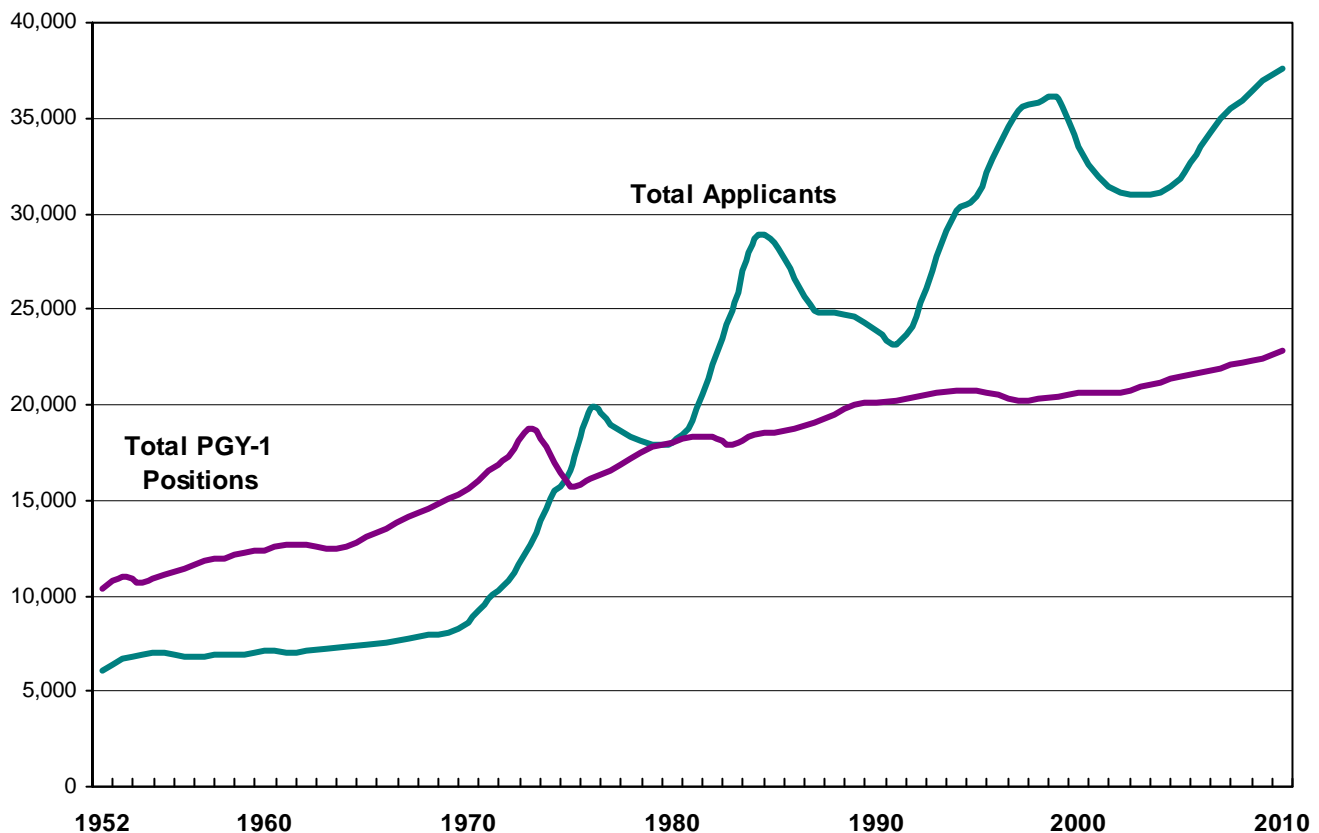

The first Match was conducted in 1952 when 10,400 internship positions were available for 6,000 U.S. graduating seniors. By 1973, there were 19,000 positions for just over 10,000 U.S. graduating seniors. Following the demise of internships in 1975, the number of first-year post-graduate (PGY-1) positions dropped to 15,700. The number of PGY-1 positions offered gradually increased through 1994 and then began to decline slowly until 1998.

This year, a record-high 22,809 PGY-1 positions were offered (Figure 1).

The increase in the total number of applicants since 1952 is more dramatic, starting with 6,000 in 1952 and rising to a high of 36,056 in 1999. After a decline of 5,052 applicants from 1999-2003, the number registered for the 2010 Match increased to 37,556. This figure is 584 more than 2009 and an all time high.

For more information about the NRMP, please visit: www.nrmp.org/. Additional data and reports for the Main Residency Match and the Specialties Matching Service can be found at: www.nrmp.org/data/. Instructions on how to request additional data also are provided.

Figure 1 Applicants and 1st Year Positions in the Match, 1952 - 2010

ACGME	Accreditation Council for Graduate Medical Education
Active Applicant	An active applicant is one who submits a certified rank order list of programs.
Applicant Type	<p>The NRMP classifies applicants for the Main Residency Match into seven applicant types:</p> <ul style="list-style-type: none">• <i>Seniors of U.S. Allopathic Medical Schools (U.S. Senior)</i>: A fourth-year medical student in an LCME-accredited U.S. allopathic school of medicine. A student with a graduation date after July 1 in the year before the Match is considered a U.S. senior. U.S. seniors are sponsored by their medical schools.• <i>Previous Graduates of U.S. Allopathic Medical Schools (U.S. Grad)</i>: A graduate with a graduation date before July 1 in the year before the Match is considered a previous U.S. graduate and is not sponsored by the medical school.• <i>Students/Graduates of Canadian Medical Schools (Canadian)</i>• <i>Students/Graduates of Osteopathic Medical Schools (Osteo.)</i>• <i>Students/Graduates of Fifth Pathway Programs (5th Pathway)</i>• <i>U.S. Citizen Students/Graduates of International Medical Schools (U.S. IMG)</i>• <i>Non-U.S. Citizen Students/Graduates of International Medical Schools (Non-U.S. IMG)</i> <p>In some tables and figures in this report, applicant types are combined into a smaller number of groups.</p> <ul style="list-style-type: none">• <i>Foreign-Trained Physicians</i>: U.S. citizen and non-U.S. citizen students and graduates of international medical schools• <i>Independent Applicants</i>: All applicant categories excluding U.S. allopathic seniors• <i>Others</i>: Includes previous U.S. graduates and Canadian, Osteopathic, and Fifth Pathway applicants
Couple	Any two applicants can register as a couple in the Match. The NRMP allows couples to form pairs of choices on their primary rank order lists, which are considered in rank order in the Match. The couple will match to the most preferred pair of programs on the rank order lists where each partner has been offered a position.
NRMP	National Resident Matching Program
PGY-1	Post graduate year one
PGY-2	Post graduate year two

Introduction

This report summarizes data from the National Resident Matching Program (NRMP) 2010 Main Residency Match, the largest in NRMP history when measured by the numbers of positions offered (25,520) and filled (24,378), as well as by the numbers of registrants (37,556) and applicants (30,543) submitting certified rank order lists of programs.

A successful Match is not measured by volume alone, but also by how well it matches the preferences of applicants and programs. One measure of that objective is the percentage of positions filled. Based on that criterion, the fill rate of 95.5 percent makes the 2010 Match the most successful on record. A by-product of a high fill rate is fewer positions available in the post-Match "Scramble." In 2010, only 1,142 first-year and second-year positions were unfilled, and about half (566) were PGY-1 only positions in preliminary surgery and preliminary medicine.

This year, 30,543 applicants vied for one of the 22,809 available first-year and 2,711 second-year residency positions; 16,070 of those applicants were U.S. allopathic medical school seniors. The number of U.S. allopathic seniors was 432 more than in 2009, continuing a trend that began several years ago with the opening of several new medical schools and the expansion of class sizes in established institutions.

Other applicants included previous graduates of U.S. allopathic medical schools, U.S. citizen and non-U.S. citizen international medical school students and graduates, students and graduates of Canadian medical schools, students and graduates of osteopathic medical schools, and students and graduates of Fifth Pathway programs. Between 2009 and 2010, active applicants who are U.S. allopathic seniors showed the largest increase among all the applicant groups in numbers (432).

The real and projected increases in the numbers of U.S. allopathic seniors have raised questions about how this growth may affect both their Match success and the success of other applicant groups. In 2010 the match rate for U.S. allopathic seniors was 93.3 percent, down from an historic high of 94.2 percent in 2008, but up slightly from 93.1 percent in 2009. The percentage of seniors who matched to their first-choice program declined from 57.0 percent to 52.7 percent, but in most specialties there continued to be more available positions than U.S. seniors who ranked them.

Some other trends of interest include:

- The PGY-1 match rate for all applicants continued to decline and at 71.2 percent was almost 4 percentage points lower than in 2006.
- The number of active U.S. citizen IMGs in the Match was 3,695, up 305 from last year and 1,260 over the five-year period; 1,749 were matched to PGY-1 positions, down 0.5 percentage points from last year.

- The number of active non-U.S. citizen IMGs was 7,246, down 238 from last year. This was the first year since 2002 that the number of non-U.S. citizen IMGs has been lower than the year before. Of those who certified rank order lists of programs, 2,881 matched to PGY-1 positions, down 231 from 2009.

Couples have been able to participate together in the Match since 1984. The two partners identify themselves as a couple to the NRMP and submit rank order lists of identical length. The algorithm treats the two lists as a unit, matching the couple to the highest linked program choices where both partners match. A record 808 couples participated in the 2010 Match. Couples continued to enjoy great success in the Match, with a match rate of 93.4 percent.

Match results can be an indicator of career interests among graduating medical school students. Highlights in 2010 include:

- In several specialties the number of matched U.S. allopathic seniors increased in 2010: Family Medicine (98), Internal Medicine (90), Surgery (Categorical) (71), Medicine-Pediatrics (58), Emergency Medicine (36), and Pediatrics (29).
- The number of Family Medicine positions offered in the Match rose by 73. The percentage filled by U.S. allopathic seniors increased from 42.2 percent in 2009 to 44.8 percent in 2010. Overall, 91.4 percent of the available Family Medicine positions were filled in 2010.
- The number of categorical Internal Medicine positions rose by 77 to 4,999. The percentage filled by U.S. seniors increased slightly from 53.5 percent in 2009 to 54.5 percent in 2010, and the overall fill rate rose to 99 percent.
- General Surgery continued to be a very competitive specialty with all but two of the 1,077 available categorical positions filled and 71 more U.S. allopathic seniors matched to that specialty.

We hope you find the data contained in the following pages useful as you reflect on the 2010 Match and prepare for future matches.

Table 1

Table 1 summarizes the 2010 Match and shows the numbers of participating programs, positions offered, and programs unfilled. It also provides ranking and matching data for U.S. seniors and all applicants.

Using Anesthesiology PGY-1 as an example:

- The first three columns show that 99 programs offered 797 Anesthesiology PGY-1 positions and that 7 of those programs were unfilled.
- The numbers of applicants are provided in the next two columns. In 2010, 1,128 U.S. seniors ranked at least one Anesthesiology program, and a total of 1,629 applicants ranked Anesthesiology.
- The next two columns show that 626 of the 797 positions offered for Anesthesiology PGY-1 were filled by U.S. seniors and 771 were filled by all applicants.
- The percent fill rates (positions filled/positions offered) can be found in the next two columns. Of the PGY-1 positions offered in Anesthesiology, 78.5 percent were filled by U.S. seniors, and overall 96.7 percent were filled.
- The ranked positions column shows that collectively U.S seniors ranked those Anesthesiology programs 7,715 times and the total number of ranks for all applicants was 9,403.

The total number of positions offered in the 2010 Match was 25,520, an all-time high and 335 more than in 2009.

Table 1 Match Summary, 2010

*Applicants can rank multiple specialties. **In 2010, 2,071 applicants matched to both PGY-1 and PGY-2 positions.

Table 2

Table 2 shows the numbers of PGY-1 and PGY-2 matches in each specialty by applicant type. There was significant variation in the number and proportion of each applicant group matching to each specialty. The data are described in more detail in Tables 10-12.

For example, the largest numbers of seniors of U.S. allopathic medical schools (U.S. seniors) matched to:

- Internal Medicine (Categorical) (2,722)
- Pediatrics (1,711)
- Medicine-Preliminary (PGY-1 Only) (1,493)
- Emergency Medicine PGY-1 and PGY-2 (1,188)
- Family Medicine (1,169)
- Anesthesiology PGY-1 and PGY-2 (1,046)
- Diagnostic Radiology PGY-1 and PGY-2 (919)
- Obstetrics-Gynecology (915)
- Surgery (Categorical) (895)
- Transitional (PGY-1 Only) (832)

For prior graduates of U.S. allopathic medical schools (U.S. Grad), the largest numbers were matched to:

- Internal Medicine (Categorical) (107)
- Family Medicine (85)
- Emergency Medicine PGY-1 and PGY-2 (69)
- Diagnostic Radiology PGY-1 and PGY-2 (65)

For students and graduates of osteopathic medical schools (Osteo), the largest numbers were matched to:

- Internal Medicine (Categorical) (292)
- Family Medicine (270)
- Pediatrics (200)
- Emergency Medicine PGY-1 and PGY-2 (163)
- Anesthesiology PGY-1 and PGY-2 (124)
- Psychiatry (Categorical) (109)
- Obstetrics-Gynecology (105)
- Physical Medicine & Rehab PGY-1 and PGY-2 (95)

For U.S. citizen students and graduates of international medical schools (U.S. IMG), the largest numbers were matched to:

- Internal Medicine (Categorical) (460)
- Family Medicine (439)
- Pediatrics (147)
- Psychiatry (Categorical) (129)
- Emergency Medicine PGY-1 and PGY-2 (115)
- Surgery-Preliminary (PGY-1 Only) (81)
- Obstetrics-Gynecology (76)
- Medicine-Preliminary (PGY-1 Only) (75)

For non-U.S. citizen students and graduates of international medical schools (Non-U.S. IMG), the largest numbers were matched to:

- Internal Medicine (Categorical) (1,339)
- Family Medicine (400)
- Pediatrics (286)
- Surgery-Preliminary (PGY-1 Only) (143)
- Neurology PGY-1 and PGY-2 (140)
- Psychiatry (Categorical) (134)
- Medicine-Preliminary (PGY-1 Only) (97)

Table 2 Matches by Specialty and Applicant Type, 2010

Tables 3 and 4

Table 3 shows the trends in the numbers of positions offered by specialty over the last five years. Although the increases were due in large part to the addition of Otolaryngology (2006), Neurology (2007), and Neurological Surgery (2009) to the Match, other specialties such as Anesthesiology and Emergency Medicine also have grown while converting from advanced (PGY-2) to categorical (PGY-1) programs.

The number of Family Medicine positions offered in 2010 (2,608) increased by 73 over the 2009 figure. Categorical Internal Medicine increased by 77 positions, and Emergency Medicine (PGY-1 and PGY-2) increased by 60 positions. Specialties that have increased or decreased by at least 10 percent—and at least 10 positions—between 2006 and 2010 are highlighted in the Table 3 arrows.

Many applicants in addition to U.S. senior medical students seek residency positions through the NRMP. Trend data for different applicant categories are shown in Table 4 and Figure 2. The arrows in Table 4 indicate increases in the numbers of active applicants that were greater than the overall increase of 14.3 percent between 2006 and 2010. An active applicant is one who submits and certifies a rank order list of programs.

As shown in Table 4, the total number of registrants rose by 584 (1.6%) in 2010, and the number of active applicants grew by 655 (2.2%). The number of active non-U.S. citizen IMGs decreased by 238 (3.2%), but the number of active U.S. citizen IMGs increased by 305 (9.0%). Students and graduates of osteopathic medical schools increased by 32 (1.6 %).

The number of active U.S. seniors rose by 432 in 2010, reflecting the opening of several new medical schools and class size expansions at established institutions. As in years past, U.S. seniors had the highest match rate; 93.3 percent (14,992) of those who submitted rank order lists were matched to first-year positions. Adding the 130 seniors who matched to PGY-2 positions but not to PGY-1 positions (not shown), 94.1 percent of U.S. seniors matched to at least one position.

Although the number of positions offered in 2010 increased by 335, the total number of active applicants grew by 655 to 30,543. Of that total, 21,749 were matched to PGY-1 positions, 409 more than last year. Because the increase in positions is not keeping pace with applicant growth, the match rate for all applicants continued to decline, from 75.1 percent in 2006 to 71.2 percent in 2010.

▲▼ Denotes increase/decrease in number of positions offered of more than 10 percent and 10 positions between 2006 and 2010. Neurology joined the Match in 2007 and Neurological Surgery joined in 2009. ACGME created a new PGY-1 Plastic Surgery (Integrated) specialty in 2009. Combined/coordinated Plastic Surgery programs (which are not integrated) now appear under PGY-2 positions. Many Anesthesiology and Emergency Medicine programs have converted their positions from Advanced (PGY-2) to Categorical (PGY-1) over the period, affecting the trends in those specialties.

Figure 2 Number of Active Applicants and Percent Matched, 2006 - 2010

*Foreign-trained physicians includes both U.S. citizen and non-U.S. citizen graduates of international medical schools.

▲ Denotes that the percentage increase in active applicants for this group was greater than the overall increase of 14.3% for all active applicants between 2006 and 2010.

Note: Match rates are based on all active applicants regardless of their ranking behavior. Therefore, applicants who matched to PGY-1 positions are counted as matched even if they ranked and did not match to a PGY-2 position. Applicants who ranked only PGY-2 programs are counted as unmatched in this table because they did not match to a PGY-1 position.

Table 5

Table 5 shows the ratios of PGY-1 positions to active applicants from 1976 through 2010. The same data are shown graphically in Figure 3. The red line in Figure 3 represents the point at which there are equal numbers of applicants and positions; above the red line represents more positions than applicants, below the line more applicants than positions. Active applicants are defined as those who submitted and certified rank order lists.

- In 2010, the ratio of PGY-1 positions per active U.S. senior remained consistent with the previous eight years. Historically, the ratio declined from 2.0 to 1 in 1972 (not shown) to a low of 1.25 to 1 in 1984 and 1985.
- The ratio of PGY-1 positions to total applicants (rather than only U.S. seniors) is quite different and has declined over the past four years from 0.81 to 1 in 2006 to 0.75 to 1 in 2009 and 2010, reflecting the fact that applicant growth has outpaced position growth.

Figure 3 Positions per All Active and Active U.S. Senior Applicant, 1976 - 2010

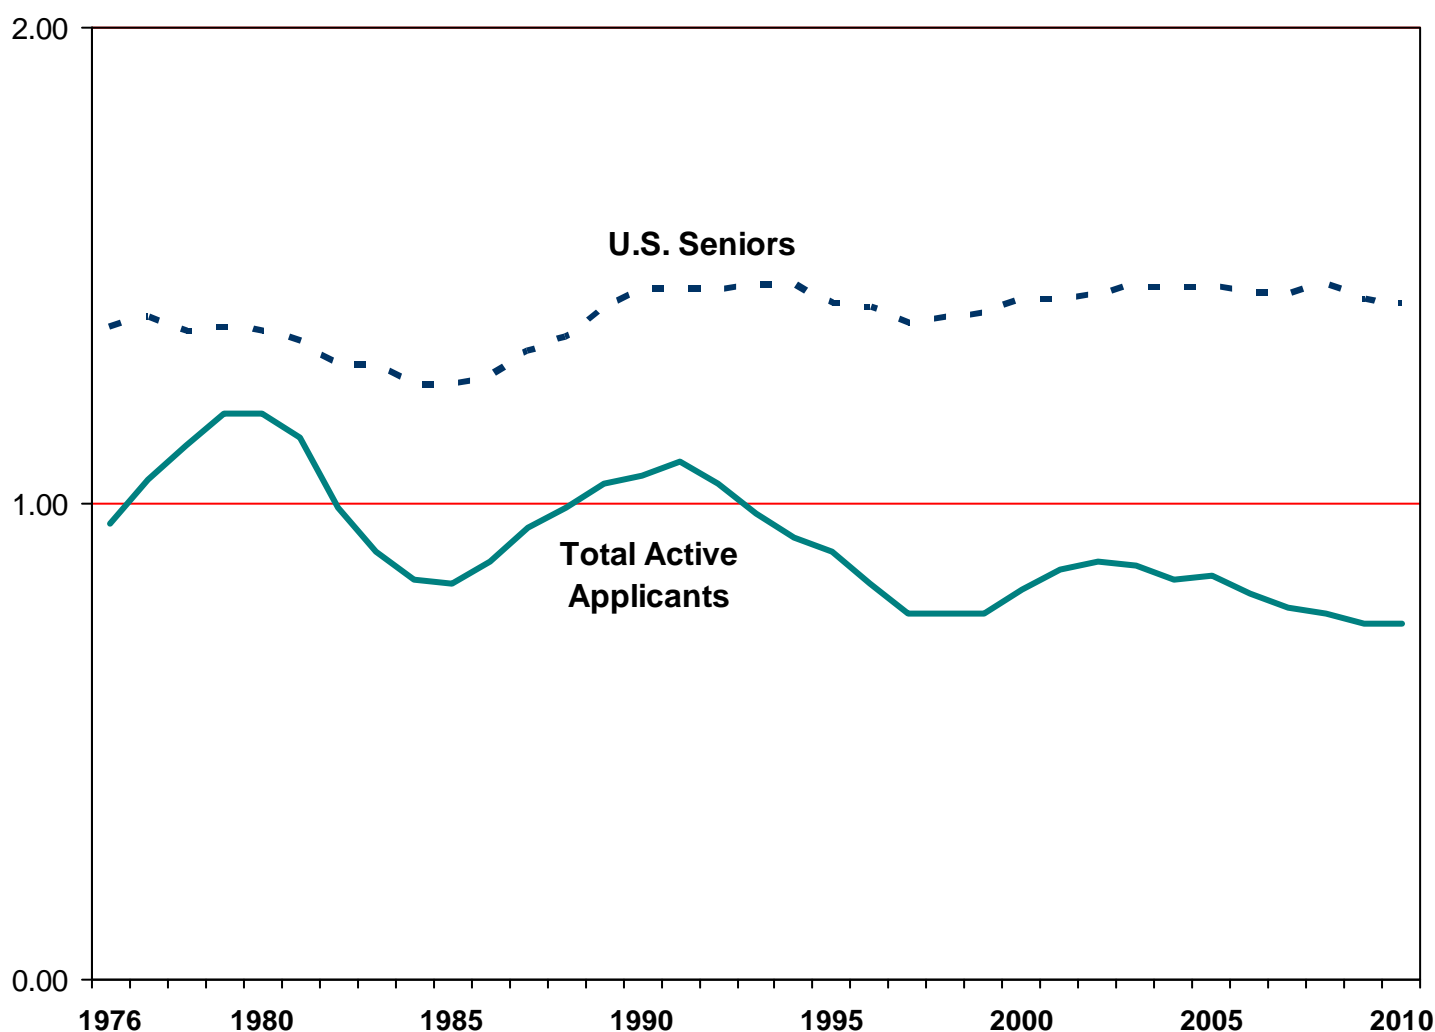

Table 5 Number of PGY-1 Positions per Active Applicant, 1976 - 2010

Year	Number of Positions	Active U.S. Seniors	Positions Per U.S. Senior	Active Total	Positions Per Active Applicant
1976	16,112	11,735	1.37	16,728	0.96
1977	16,574	11,898	1.39	15,854	1.05

2003	20,908	14,332	1.46	23,965	0.87
2004	21,192	14,609	1.45	25,246	0.84
2005	21,454	14,719	1.46	25,348	0.85
2006	21,659	15,008	1.44	26,715	0.81
2007	21,845	15,206	1.44	27,944	0.78
2008	22,240	15,242	1.46	28,737	0.77
2009	22,427	15,638	1.43	29,888	0.75
2010	22,809	16,070	1.42	30,543	0.75

Note: Applicants who withdrew or did not rank programs are excluded.

Table 6

Table 6 displays the match rates to PGY-1 positions for U.S. allopathic seniors, U.S. citizens trained in international medical schools (U.S. IMGs), non-U.S. citizens trained in international medical schools (Non-U.S. IMGs), and other applicants (Canadian medical school students/graduates, osteopathic medical school students/graduates, Fifth Pathway applicants, and U.S. physicians who are prior-year graduates of U.S. allopathic medical schools). The data are shown graphically in Figure 4. Match rate is defined in Table 6 and Figure 4 as the percentage of active participants who matched to PGY-1 positions.

- 93.3 percent of U.S. allopathic seniors were matched in 2010, a slight increase over the 2009 figure of 93.1 percent.
- 47.3 percent of U.S. citizens trained in international medical schools were matched, down from the 2009 figure of 47.8 percent.
- The match rate for non-U.S. citizens trained in international medical schools continued to decline, from 48.9 percent in 2006 to 39.8 percent in 2010.

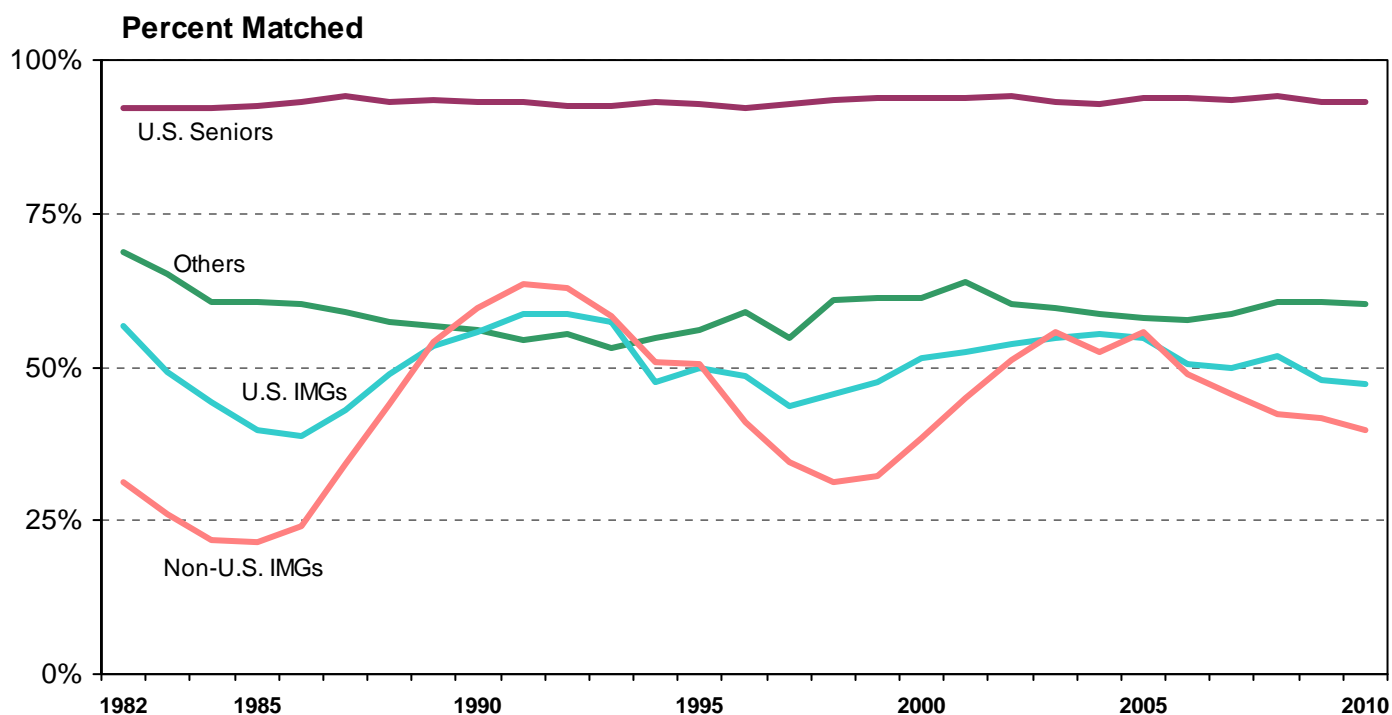

Figure 4 PGY-1 Match Rates by Applicant Type, 1982 - 2010

Table 6 PGY-1 Match Rates, 1982 - 2010

Year	Number of Positions	Total Active Applicants	Percent Matched				All Applicants

2009	22,427	29,888	93.1	47.8	41.6	60.5	71.4
2010	22,809	30,543	93.3	47.3	39.8	60.2	71.2

Tables 7 and 8

Table 7 displays the numbers of positions offered by specialty, as well as the numbers filled by U.S. seniors and by an aggregate of all other applicants. The data in Table 7 are shown graphically in Figure 5 for specialties that offered at least 100 positions. Table 8 displays the same information in percentages.

- In 2010, 24,378 matches were made to PGY-1 and PGY-2 positions, an increase of 339 over 2009.
- The position fill rate for all programs also rose in 2010, and at 95.5 percent was the highest ever.
- Emergency Medicine placed a total of 1,575 PGY-1 and PGY-2 positions in the Match this year, 60 more than in 2009 and 209 more than in 2006.
- Family Medicine put 73 more positions in the Match this year, filled 73 more positions, and matched 98 more U.S. seniors.
- Internal Medicine (categorical) placed 77 more positions in the 2010 Match, filled 94 more positions than in 2009, and matched 90 more U.S. seniors.

Other specialties of note are:

- Specialties and specialty tracks with at least 10 positions in the Match and 100 percent fill rates:

Internal Medicine-Emergency Medicine: PGY-1
Neurology: PGY-1
Pediatrics-Primary: PGY-1
Radiation Oncology: PGY-1
Plastic Surgery (Integrated): PGY-1
Thoracic Surgery: PGY-1
Emergency Medicine: PGY-2
Plastic Surgery: PGY-2

- Specialties with at least 10 positions in the Match and more than 90 percent filled by U.S. seniors:

Neurological Surgery: PGY-1
Orthopedic Surgery: PGY-1
Otolaryngology: PGY-1
Radiation Oncology: PGY-1

▲ Denotes increase/decrease in number of positions filled by U.S. allopathic seniors of more than 10 percent and 10 positions between 2006 and 2010. Neurology joined the Match in 2007 and Neurological Surgery joined in 2009. ACGME created a new PGY-1 Plastic Surgery (Integrated) specialty in 2009. Combined/coordinated Plastic Surgery programs (which are not integrated) now appear under PGY-2 positions. Many Anesthesiology and Emergency Medicine programs have converted their positions from Advanced (PGY-2) to Categorical (PGY-1) over the period, affecting the trends in these specialties. Ophthalmology and Urology participate in other matching services.

Figure 5 Number of Positions Offered and Filled for Selected Specialties,* 2010

*Specialties offering at least 100 positions. Data for specialties offering both PGY-1 and PGY-2 positions have been combined in this figure.

Neurology joined the Match in 2007 and Neurological Surgery joined in 2009. ACGME created a new PGY-1 Plastic Surgery (Integrated) specialty in 2009. Combined/coordinated Plastic Surgery programs (which are not integrated) now appear under PGY-2 positions. Many Anesthesiology and Emergency Medicine programs have converted their positions from Advanced (PGY-2) to Categorical (PGY-1) over the period, affecting the trends in these specialties. Ophthalmology and Urology participate in other matching services.

Tables 9-12

Tables 9 through 12 display the numbers of PGY-1 matches by specialty for four different groups: all applicants (Table 9), U.S. seniors (Table 10), osteopathic students and graduates (Table 11), and foreign-trained physicians (Table 12). Foreign-trained physicians are U.S. citizen and non-U.S. citizen students and graduates of international medical schools, excluding Canadian and Fifth Pathway applicants. Specialties that placed at least 10 positions in the Match and showed an increase or decrease in the numbers of matched applicants of greater than 10 percent between 2006 and 2010 are highlighted with arrows.

In 2010, more U.S. seniors (see Table 10) matched to Emergency Medicine, Family Medicine, Internal Medicine (categorical), Internal Medicine-Pediatrics, Obstetrics-Gynecology, Surgery (categorical), Pediatrics, and several other specialties. The numbers of U.S. seniors matched to Pediatrics-Primary, Diagnostic Radiology, Medicine-Preliminary (PGY-1 only), Neurology, and Transitional Year (PGY-1 only) declined this year.

Table 11 shows by specialty the number of osteopathic medical school students and graduates who matched to PGY-1 positions. Historically, osteopathic students and graduates have matched primarily to Family Medicine and Internal Medicine (categorical), but interest in Obstetrics-Gynecology, Pediatrics (categorical), Emergency Medicine, Anesthesiology, and Psychiatry (categorical) has grown over the past few years.

Table 12 shows by specialty the numbers of foreign-trained physicians who matched to PGY-1 positions. By far the largest percentage (38.9%) obtained positions in Internal Medicine (categorical). The next largest group was in Family Medicine (18.1%). Pediatrics (categorical) was the third largest with 9.4 percent, and Psychiatry (categorical) was fourth (5.7%). Together, those four specialties accounted for 72.1 percent of the PGY-1 positions filled by foreign-trained physicians.

*Foreign-trained physicians include both U.S. citizen and non-U.S. citizen graduates of international medical schools.

▲▼ Denotes increase/decrease in number of positions filled by U.S. allopathic seniors of more than 10 percent and 10 positions between 2006 and 2010. Neurology joined the Match in 2007 and Neurological Surgery joined in 2009. ACGME created a new PGY-1 Plastic Surgery (Integrated) specialty in 2009. Combined/coordinated Plastic Surgery programs (which are not integrated) now appear under PGY-2 positions. Many Anesthesiology and Emergency Medicine programs have converted their positions from Advanced (PGY-2) to Categorical (PGY-1) over the period, affecting the trends in these specialties. Ophthalmology and Urology participate in other matching services.

Table 13

Table 13 displays the numbers of U.S. seniors and independent applicants (all applicants other than U.S. seniors) who ranked each specialty as their only choice, first choice, or not first choice: *Only choice* includes applicants who ranked that specialty first on their rank order lists (ROLs) and ranked no other specialties. *First choice* includes applicants who ranked that specialty first and ranked at least one other specialty. *Not first choice* includes applicants who ranked another specialty first but also included that specialty on their rank lists. *Preferred choice* is defined as first choice ignoring any subsequent choices. Preliminary programs and Transitional Year programs were excluded from the counts because they are not considered a preference for a specific specialty.

In addition, the table shows the ratio of applicants choosing a specialty to the number of positions in that specialty. For example:

- 211 U.S. allopathic seniors ranked at least one Neurological Surgery program (199 plus 9 plus 3). Neurological Surgery was the preferred specialty of the 208 U.S. seniors for whom it was the only or first choice. With 191 positions offered, the ratio of positions to U.S. senior applicants who ranked Neurological Surgery and for whom that specialty was the first or only choice was 0.9 to 1.
- 1,348 U.S. allopathic seniors ranked at least one Family Medicine program, and it was the only or first choice for 1,171 of them. With 2,608 positions offered, the ratio of positions to U.S. senior applicants was 2.2 to 1, indicating far fewer U.S. senior applicants than available positions.

Although the ratios for U.S. seniors and the total applicant pool are similar in many specialties, there are notable exceptions. In some specialties, the ratios for U.S. seniors were significantly higher than for all applicants combined (Family Medicine, Internal Medicine, Physical Medicine and Rehabilitation), meaning all other applicants ranked those specialties much more frequently than did U.S. allopathic seniors.

Table 13 Applicant Choices by Specialty, 2010

Specialty	U.S. Seniors					Independent Applicants				Positions per All Applicants
	Total Positions	Preferred Choice			Positions per U.S. Senior	Preferred Choice			Positions per IA

Vascular Surgery	22	0	30	9	0.7	10	11	12	1.0	0.4
TOTAL	21,462	14,225	1,125	1,227		10,237	3,979	5,180		

Only choice includes applicants who ranked that specialty first on their rank order lists (ROLs) and ranked no other specialties. **First choice** includes applicants who ranked that specialty first and ranked at least one other specialty on their ROLs. **Not first choice** includes applicants who ranked another specialty first but also include that specialty on their ROLs. **Preferred choice** is defined as either only choice or first choice. Preliminary programs and Transitional Year programs were excluded from these counts since they are not considered a preference for a specific specialty.

Total Positions: includes all positions offered in a specialty, except preliminary positions.

Positions Per U.S. Senior: is the ratio of Total Positions to the number of U.S. seniors for whom that specialty was the first or only choice.

Positions Per Independent Applicant (IA): is the ratio of Total Positions to the number of independent applicants for whom that specialty was the first or only choice.

Positions Per All Applicants: is the ratio of Total Positions to the number of U.S. seniors and independent applicants for whom that specialty was the first or only choice.

Table 14

The 2010 Match results for U.S. seniors and independent applicants who ranked only one specialty can be found in Table 14 and Figure 6.

Larger percentages of U.S. seniors than independent applicants preferred Anesthesiology, Emergency Medicine, Orthopaedic Surgery, Pediatrics, and Radiology-Diagnostic. Larger proportions of independent applicants chose Family Medicine and Internal Medicine.

The higher percentages of unmatched U.S. senior applicants in such specialties as Dermatology (DM), Neurological Surgery (NS), Orthopaedic Surgery (OS), Otolaryngology (OT), Plastic Surgery (PS), Radiation Oncology (RO) and Surgery-General (SG) (Figure 6, top) reflect the fact that there are significantly more applicants interested in those specialties than there are available positions. That disparity also is reflected in the high fill rates (Table 1) for those specialties.

For all specialties, a larger percentage of independent applicants failed to match when compared to U.S. seniors (Figure 6). Neurological Surgery (NS), Orthopaedic Surgery (OS), Otolaryngology (OT), Radiation Oncology (RO), and Surgery – General (SG) had the highest unmatched rates among the specialties chosen by independent applicants.

Table 14 Match Results for U.S. Seniors and Independent Applicants Who Ranked Only One Specialty, 2010

Figure 6 Percentages of Unmatched U.S. Seniors and Independent Applicants Who Ranked Only One Specialty, 2010

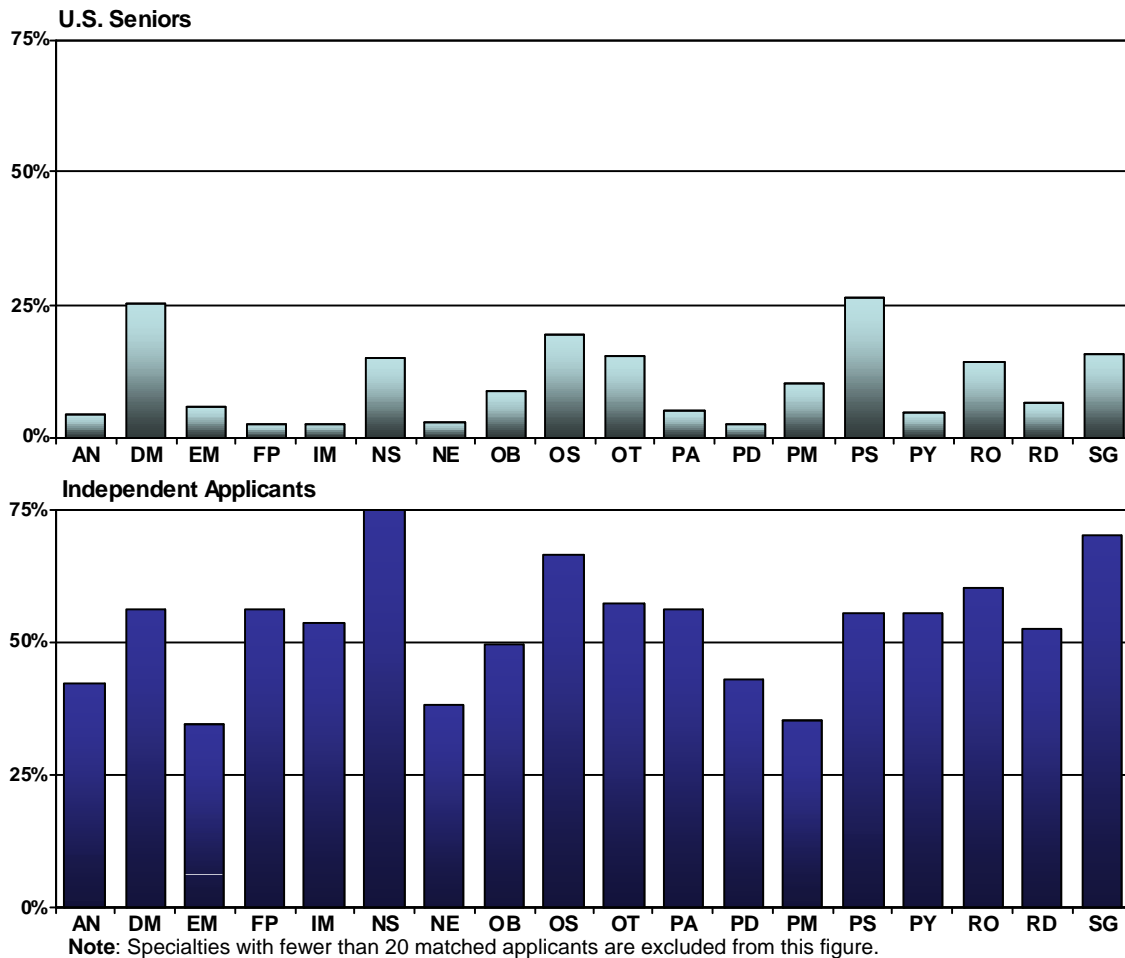

Table 15

Table 15 shows the trends between 1997 and 2010 in the percentages of U.S. allopathic seniors and independent applicants matching to their first, second, third, fourth, or lower than fourth program choice on their rank order lists. The calculation of the percentages includes the number of unmatched applicants. In earlier years the percentages were based only on matched applicants. This change was made to more accurately reflect the percentages of applicants who obtained matches at different ranks and to more clearly portray the differences between U.S. seniors and independent applicants (see Table 6 for trends in overall match rates by applicant type). The differences in the two calculations can be seen in Figure 7.

Because applicant growth has outpaced position growth over the last several years, it is not surprising that the percentage of applicants matching to their first-choice programs has declined. Although about one-half of U.S. seniors match to their first-choice programs, among independent applicants the percentage of first-choice matches declined from 32.8 percent in 2003 to 23.8 percent in 2010.

Figure 7 compares the percentage of applicants matched to programs by rank choice in the 2010 Match using both the historic (top two figures) and revised (bottom two figures) calculations. As the bottom two figures show, a significantly higher percentage of U.S. allopathic seniors matched to their first-choice programs compared to independent applicants.

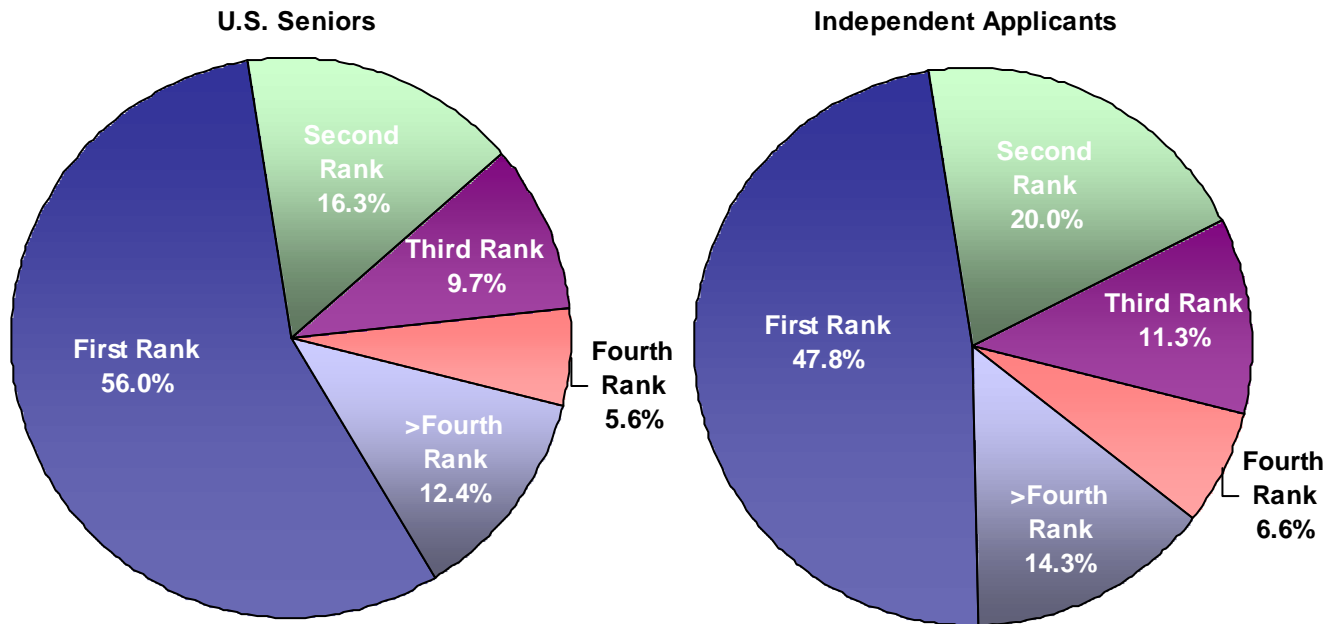

Table 15 Matches from U.S. Seniors' and Independent Applicants' Rank Order Lists, 1997 - 2010

Year	First Rank		Second Rank		Third Rank		Fourth Rank		> Fourth Rank		Unmatched

Figure 7

Percent of Matches by Choice and Type of Applicant, 2010

Matched Applicants

All Applicants

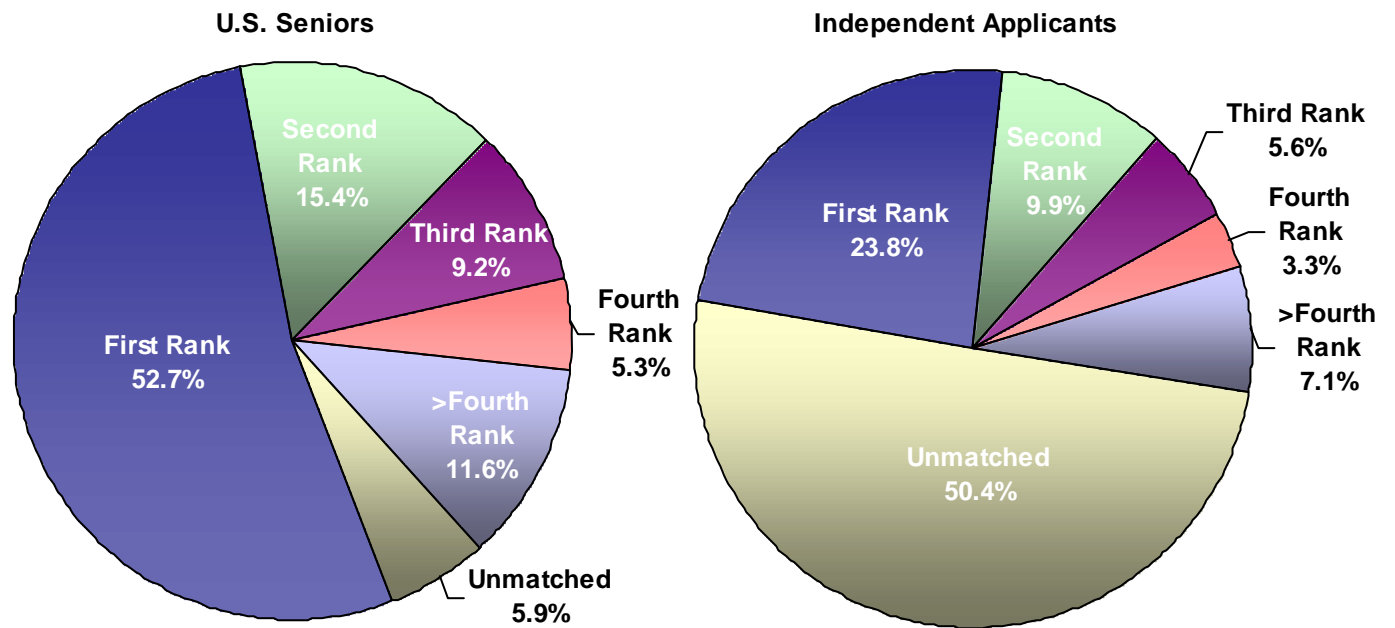

Table 16

Couples have been able to participate together in the Main Residency Match since 1984. The two partners identify themselves as a couple to the NRMP and submit rank order lists of identical length. The algorithm treats the two lists as a unit, matching the couple to the highest pair of program choices where both partners obtain a match.

In 2010, 1,616 applicants (808 couples) participated in the Match as couples. The figure was an all-time high and represented a 2.5 percent increase from 2009. Couples enjoy great success, with match rates above 90 percent every year since 1984. In 2010, the match rate for couples was 93.4 percent, up slightly from 93.1 percent in 2009. About 78 percent of couples are U.S. seniors, and their match rates are quite similar to those of their classmates, varying within 1 or 2 percentage points each year.

Couples have the option of one partner indicating a willingness to go unmatched at a certain rank on the rank order list if the partner matches to the program linked to that rank. Table 16 shows the number of couples matched with this option in the *One Matched* column (50 in 2010).

Table 16 Number of Couples in the Match by Match Outcome, 1987 - 2010

Year	Couples	Individuals	Both Matched	One Matched	Neither Matched	Match Rate %
1987	347	694	316	14	17	93.1
1988	388	776	355	19	14	93.9

2010	808	1,616	730	50	28	93.4

Figure 8 Number of Couples in the Match by Match Outcome, 1987-2010

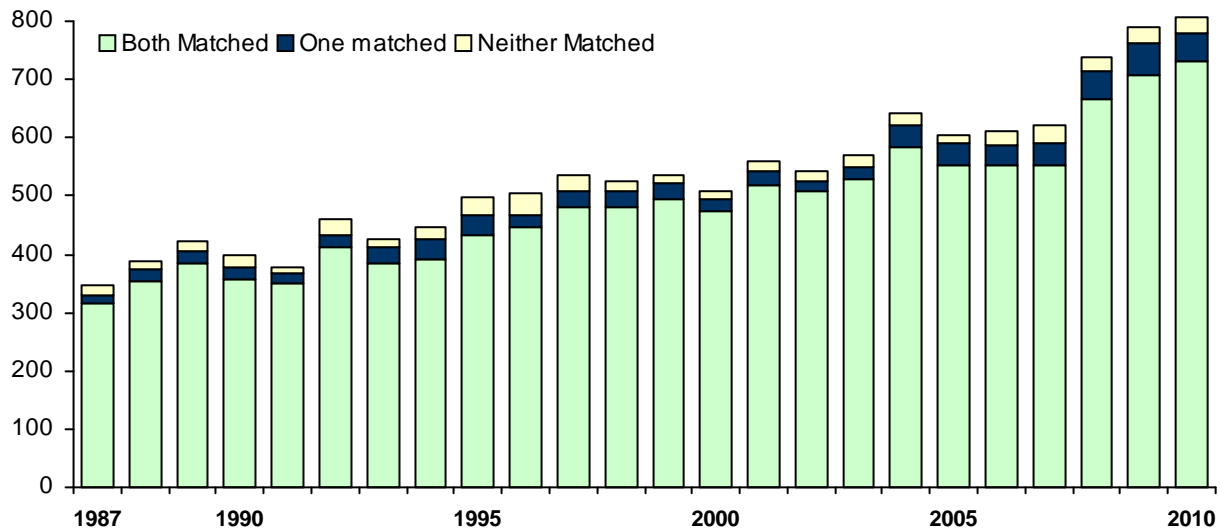

Table 17

Table 17 displays by specialty the average number of ranked applicants needed to fill each position within programs. Only programs that filled all of their positions are included in the calculations. Specialties with fewer than 5 programs that filled all positions also were excluded to maintain their anonymity. Although this measure is affected by such factors as the number and geographic distribution of programs as well as the number of programs ranked per applicant, it is a rough measure of specialty competitiveness. It may be more appropriate to interpret the data within each specialty across time and less appropriate to compare across specialties, especially for specialties with a large proportion of programs that do not fill.

Using Anesthesiology as an example, on average programs ranked 7.5 applicants to fill each position in the 2010 Match. That figure represents an increase of 1.3 ranked applicants per filled position over the 2009 average of 6.2.

Table 17 Average Number of Ranked Applicants Needed to Fill Each Position by Specialty, 2006 - 2010

NRMP Program Results 2010 Main Residency Match

NRMP Program Results lists every hospital that participated in the Match, along with the number of positions offered and filled for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs having vacancies; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match.

There are also three reasons why applicants may not be matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the Match.

The following types of programs are offered through the NRMP:

- Categorical (C) positions are positions in programs that expect applicants who enter in their first post graduate year to complete the training required for certification in that specialty, provided their performance is satisfactory. Categorical programs in primary care medicine and primary care pediatrics are designated by (M) to distinguish them from regular medicine and pediatrics programs.

- Preliminary (P) positions are for one or two years of training as prerequisite for entering advanced positions in specialty programs that require one or more years of broad clinical training. Internal medicine, surgery, and transitional programs commonly offer preliminary positions.

- Advanced (A) positions (beginning in 2011) are positions in specialty programs that begin after completion of one or more years of preliminary training. Applicants without prior graduate medical education can apply for those positions while also applying for preliminary positions (beginning in 2010) that are compatible with their plans.

- Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for physicians

who have had prior graduate medical education. Physician positions are not available to U.S. senior medical students.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty.
- The eighth character represents the program type:
 - P – Preliminary program
 - C – Categorical program
 - M – Primary program
 - A – Advanced program
 - R – Physician program
 - F – Fellowship program
- The ninth character represents the track:
 - 0 – first program/track in the specialty and program type at the institution
 - 1 – second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 – third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).

Examples:

Institution: **1853** – North Colorado Medical Center
ACGME Number: **120-07-11-074** – Family Medicine
Program Type: **C** – Categorical

First Track: **0** – (Main Program)
Program Code: 1853120C0

Second Track: **1** – Wray (Rural Training Track)
Program Code: 1853120C1

Second Track: **2** – Sunrise (Community Health Center)
Program Code: 1853120C3

Note: See ACGME Specialty Codes on the following page.
